

## GOLD FISH AMPLIFIED BRAKING DEVICE SET

**incl. HMS RONDO 3-way autolock with Selfie, hard-coated**

Art.no.: AB20Y-SET

A second, even more robust version of the well established FISH amplified braking device adds more to the name GOLD FISH than just its color. Just like the FISH, the newly designed GOLD FISH comes as a set: The belay device is available in eye-catching gold with the standard anodized coating. The HMS RONDO 3-way-autolock with "Selfie" is hard-coated, a specialized anodized coating. Thanks to its double strength and higher base-hardness, this coating offers higher robustness and therefore a much longer lifetime – perfect for frequent use.

Weighing in at an unrivaled 68 g the GOLD FISH is an amplified braking device for single ropes with a diameter of 8-11mm which securely catches each fall. Pulling out on the unique dorsal lever to release the rope brings you smoothly back to solid ground. The hybrid belay device is sold only in combination with HMS RONDO autolock carabiners with "Selfie" twist protection to ensure optimum functionality.

### use cases:

sports climbing
