

COBRA® PRO STYLE ALUMINIUM

38 mm, standard clips

Art.no.: FY38KFV

The COBRA® PRO STYLE is the world leading safety buckle made of aluminium. Thanks to its patented locking mechanism and high breaking strength it meets the highest safety requirements. In combination with a fitting webbing, the minimum guaranteed load capacity is 9 kN tensile strength and 18 kN in loop configuration.

This version of the COBRA® PRO STYLE is intended for 38 mm webbing width. The ergonomically designed brass clips of XL size support an ideal opening of the buckle. Thanks to the adjuster bar on the female part of the buckle, the webbing length can be adjusted individually. On the non-adjustable male part the webbing needs to be sewn in.

Features:

- Both clips need to be pressed at the same time to open the COBRA®. One-sided release by pressing only one clip is nearly impossible.
- A release under tension is impossible.
- A one-sided locking is nearly impossible. Locking is confirmed by a distinct “clicking” sound.
- The cut-out on the backside of the COBRA® PRO STYLE prevents dirt, dust, ice or snow from getting caught in the buckle, which increases the extreme performance capabilities and lifetime even more.
- All sizes and variants of the COBRA® PRO STYLE are compatible.

use cases:

PPE, Fashion, air sports, tactical, equipment
